Election/Restriction

Claim 14 is generic to the following patentably distinct species of the claimed invention:

a. Species I of Fig. 4(a), drawn to an optoelectronic device wherein a grating type periodic microstructure is present on each of the two surfaces of a metal electrode.

b. Species II of Fig. 4(b), drawn to an optoelectronic device wherein a grating type periodic microstructure is present only at the metal electrode and air interface.

c. Species III of Fig. 4(c), drawn to an optoelectronic device wherein a grating type periodic microstructure is present only at the metal electrode and dielectric or semiconductor layer interface.

d. Species IV of Fig. 4(d), drawn to an optoelectronic device wherein a grating type periodic microstructure is present only at the dielectric layer and air interface.

1. The species are independent or distinct because claims to different species recite mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

3. There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. Furthermore, the species require a

different field of search and the prior art applicable to one species is not applicable to another species.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abul Kalam whose telephone number is 571-272-8346. The examiner can normally be reached on Monday - Friday, 9 AM - 5 PM.
